

ISIS - Bug #2214

Redundant constructor for ShapeModel

2015-01-16 01:27 PM - Jean Backer

| | |
|---|--------------------------|
| Status: Closed | Software Version: |
| Priority: Normal | |
| Assignee: Kelvin Rodriguez | |
| Category: API | |
| Target version: 3.4.13 (FY16 R3 2016-08-31 Aug) | |
| Impact: ShapeModel class no longer has constructor SampleClass(Target, Pvl). This does not affect ISIS applications. | |
| Description | |
| <p>The ShapeModel class constructor that takes a pvl and a target is redundant. The pvl is not used, so this constructor is identical to the constructor that takes only a target.</p> <pre>ShapeModel::ShapeModel(Target *target, Pvl &pvl) { Initialize(); m_target = target; }</pre> | |
