

ISIS - Feature #2397

Feature # 2262 (Closed): Add new isisminer application to system

update ImportPdsTable class with changes for isisminer

2016-02-19 11:26 AM - Ian Humphrey

Status: Closed	
Priority: Normal	
Assignee: Ian Humphrey	
Category: API	
Target version: 3.4.12 (FY16 R2 2016-03-17 Mar)	
Impact: When isisminer is added to ISIS, it can import PDS tables	Software Version:
Description	
<p>The ImportPdsTable class has been updated so isisminer can better use it. These API changes include:</p> <ul style="list-style-type: none">* added protected getColumnFields to retrieve data from columns with multiple values (i.e. fields)* added a getter and setter for the table name* added protected getColumnDescriptor to retrieve the column description by reference* encapsulated the loading of table row data in processRow* getColumnDescription now obtains the the number of items and number of bytes per item when returning the ColumnDescr* loadLabel can now be passed a tblname parameter to specify which table to load the PDS table label from <p>These changes need to be put into ISIS and tested.</p>
