

ISIS - Feature #3888

Develop ingestion application for Rosetta VIRTIS instrument

2016-04-07 02:27 PM - Kris Becker

Status: Resolved	
Priority: Normal	
Assignee: Kristin Berry	
Category: Applications	
Target version: 3.4.13 (FY16 R3 2016-08-31 Aug)	
Impact: No impact on existing ISIS applications.	Software Version:
Description Support for the Rosetta VIRTIS instrument is being added to ISIS. We first need an ingestion program that will convert the VIRTIS data provided in PDS format into an ISIS cube. Note this instrument should be very similar to the Dawn VIR instrument. Please review dawnvir2isis as a potential starting point to expedite the development.

test using ISIS at /work/projects/isis/latest/m03888/isis

convenient test data is available at that \$ISISROOT../testData (newer data with correct labels) and \$ISISROOT../test_data (older "draft" data with labels that need to be fixed by rosvirtis2isis)
