

ISIS - Bug #4550

error 'cannot execute binary file' when I run qview

2016-11-28 07:03 AM - Costanza Costanza

Status: Rejected	
Priority: High	
Assignee: Stuart Sides	
Category: Installation	
Target version:	
Impact:	Software Version:
Description	
Hi,	
I installed isis3 on ubuntu12.04 since two weeks but when I try to run qview (or other isis applications) on the terminal there is written:	
' cannot execute binary file '	
I've installed all in the same directory and I already searched many possible solutions (like for instance here: https://isis.astrogeology.usgs.gov/IsisSupport/index.php/topic.3603.msg14240.html#msg14240) but they were not useful, nothing has changed and the error ' cannot execute binary file ' still continues to appear.	
I have already changed isis3Startup.sh with the locations where I installed all things but nothing changed.	
PLEASE someone can help me?	
I use java version "1.8.0_111" . I tried to change java but it didn't work.. this java version is ok or not ?	
What can I do ?	
Thank you.

Hi Costanza,

After setting up your environment for ISIS, please run the following command and post the output:

```
ldd $ISISROOT/bin/qview
```

#3 - 2016-11-30 03:57 AM - Costanza Costanza

Thanks.

I run:

```
ldd $ISISROOT/bin/qview
```

but there is written:

```
' not a dynamic executable '
```

Costanza,

The Ubuntu 12 build of ISIS is a 64 bit version. Is it possible you installed the 32 bit version of Ubuntu?
